

Science Faculty - The Girls' Middle School

Imagine a school where each day is alive with learning, creativity, and a spirit of adventure. Where the transition from childhood to young adulthood is celebrated and growing minds flourish. Is this a place where your teaching expertise will thrive? If yes, we want you!

The Girls' Middle School is committed to progressive education and innovative programming, creating an environment designed to embrace differences in its students. GMS educates girls during a pivotal time in their lives. Our project-based curriculum encourages creativity, problem-solving, and independent thought. Attention to our students' emotional and social growth develops self-knowledge and confidence and instills values of leadership, social awareness, teamwork, compassion and a true love of lifelong learning. The Girls' Middle School enables our young women to spread their wings, take risks, and be self-reliant. Learn more about GMS: www.girlsms.org.

GMS celebrates all perspectives coming together in community. We want great teachers with many differences, because we know diversity enriches us by bringing to GMS new experiences, views, and knowledge about the world.

Teaching at GMS

The management team at GMS recognizes that our faculty are the people with the vision, inspiration and courage to lead our students through their middle school experience. It is the interactions with compassionate, caring teachers that inspire young minds to reach beyond what they thought possible and expand their world. These are the people we want to join us for the 2021 – 2022 school year.

We request candidates who are joyful, inclusive, and respectful of people, ideas, facts, and themselves. Our teachers are passionate, mission-driven, highly collaborative and believe in the value of a diverse and equitable school environment. GMS provides you autonomy in creating curriculum and learning experiences; opportunities to implement multi-faceted, interdisciplinary projects; encouragement and resources to continue your professional development.

Science at GMS

Science is a natural process of observing phenomena, wondering how the world works, and developing ways to answer these inquiries. Every student at GMS is a scientist who learns and practices the skills that professional scientists use in their daily endeavors. Because science is a way of understanding the world around us, rather than a collection of vocabulary and facts,

students engage in hands-on exploration and tangible projects as they explore the natural world.

The GMS science curriculum explores the concepts that have shaped earth, life and the physical environment. We focus on building science skills across the students' three years as they move through different disciplines. Our goal is for girls to have authentic science experiences that teach them to discover connections in the physical world and inspire them to engage with science in high school and beyond.

What we look for in a Science Teacher

- Bachelor's degree in a science or related discipline – advanced degree and teaching experience a plus;
- Teaching that inspires enthusiasm, confidence, and deep understanding in science;
- Commitment to experiential, project-based learning, narrative assessment, and other progressive pedagogies;
- Eagerness to collaborate closely with teaching teams;
- Focus on supporting girls to discover their strengths and find their voice.

If you are looking for an opportunity to make a difference; join a fantastic, kind, inclusive team; and wake up each day fulfilled by your mission, please submit a resume and letter of interest to: Ms. Laura Reeve, Assistant Head of School at employment@girlsms.org.
